

Amazon Alexa Setup (e-zone)

Getting Started

- Download Alexa App in your mobile device. Please follow this [link](#) if you haven't done this.
- Setup your Echo device through the app. Please follow this [link](#) if you haven't done this.
- Make sure you have the latest version of e-zone app on your wall mounted touch screen.

Pairing Easy Zone

- Open the Alexa App and go to the settings menu. 
- Select Skills & Games.
- Tap the search icon  and search for “easy zone”.
- Select the “easy zone” skill and tap the “enable to use” button. This will take you to the “Account Linking” page. The access code can be generated from your e-zone app.
- Open the e-zone app on your wall mounted touch screen, go to Setup – Options. Press the “add” button, then in Account Linking Wizard page, press the “generate” button.
- Return to your mobile phone and enter the access code on the easy zone Account Linking setup page and press “submit”.
- If you go over the two minute time limit then you can generate the access code in the Account Linking Wizard page again.

Once connected your commands will be:

- ❖ Alexa, open/tell/start easy zone or Alexa, easy zone
- ❖ Alexa, Ask easy zone to turn off (or on) the Aircon
- ❖ Alexa, Ask easy zone to run ez welcome (or ez goodbye)
- ❖ Alexa, Ask easy zone for help

To unlink your Amazon account from easy zone, follow steps below:

- Open the Alexa App and go to the settings menu. 
- Select Skills & Games.
- Select the “easy zone” skill and tap the “disable skill” button.
